

# NEWPORT

Meat & Seafood | a Sysco company

## OUR MISSION

Since 1929, when our business was founded, Newport Meat Northern California focus has always been on supplying meats and seafood of the highest quality and trim standards to the greater San Francisco Bay Area.

Most companies handle meat and seafood as a commodity, basing their buying decisions on the lowest price. At Newport, we learned long ago that the true value of our products is based upon yield, appearance and most importantly, taste. We understand the benchmark of our success has and will always be the satisfaction of guests when they taste our products.

# QUALITY IN ALL WE DO

---

For all of us at Newport Meat Company, Newport Pride is so much more than a brand...it is how we conduct our business. We take pride in the products we produce, the farmers, ranchers and fisherman we source from and the customers we service. We are also proud of our dedicated team of professionals that are passionate about delivering high quality products and industry leading service.

We will always treat our customers, employees and suppliers with fairness and respect. In addition, we will continue to create products that represent quality and value. Newport has grown to one of the largest, most reputable meat and seafood purveyors in Northern California; however, our business will always be built one customer at a time and sustained by earning our customers' trust time and again.
